

Olympia Compounding Pharmacy – The Nation’s Leading TriMix Pharmacy

Olympia Compounding Pharmacy, located in Orlando Florida, is a state of the art, FDA registered outsourcing facility. We offer over 20 different BiMix, TriMix and QuadMix formulas. We have perfected our own “Freeze Mixing” process to insure our medications are the freshest available from any compounder.

Why purchase medication from an FDA outsourcing facility?

The Compounding Quality Act, passed in late 2013, created a new designation of compounding pharmacy, the *FDA Registered Outsourcing Facility*. In accordance with the new law, **ONLY** an Outsourcing Facility can provide medication to be administered, in office, by physicians or other medical staff. For an Erectile Dysfunction clinic, this means the test doses administered in office, **MUST** come from an FDA Outsourcing Facility. Olympia can be your single source pharmacy to provide both in office Test Dose Medication and Patient Specific Prescription Medications, guaranteeing quality and uniformity.

Why purchase from Olympia?

- **Our staff is very knowledgeable:** Olympia has a specialized “ED” department that has been educated on penile injection therapy. This department at Olympia excels at fielding phone calls from physicians and patients. For clinics who obtain VIP status with Olympia, this line is available 24/7.
- **Infrastructure:** We have the infrastructure in place to receive and fill prescriptions very quickly. Clinics are assigned their own personal fax number to send prescriptions. Prescriptions received by 5pm will ship the same day. We currently fill thousands of ED prescriptions each month!
- **Beyond Use Date (BUD):** Olympia performs all necessary testing to provide the longest BUD on ED medications. This testing is performed by independent, 3rd party, CGMP facilities and includes batch sterility, potency, endotoxin, method suitability, compatibility and advanced stability testing. Without these tests, a pharmacy compounder can only provide BUD’s up to 45 days without acceptable CGMP validations. Olympia can provide BUD’s up to one year (frozen), which means more convenience for your patients, who can purchase more medication to last a longer period of time.
- **Peace of Mind:** As a registered FDA Outsourcing Facility, Olympia’s medication, lab and equipment are held to a much higher standard than a traditional 797 compounder. All medication is held in quarantine for 14 days and is not released until sterility, potency and endotoxin testing has been completed by a 3rd party laboratory. You can rest assured your patients are receiving the highest quality medication available.

Olympia Compounding Pharmacy remains on the cutting edge of technology and safety, providing our patients and physicians with the safest medication, top notch customer service and most convenient technology.
